## Professional Summary

Software Engineer with 3+ years of experience specializing in **Core PHP, Laravel, and CodeIgniter**. Skilled in **API integration, payment gateways** (Razorpay, PayPal, Stripe), and front-end development using **HTML, CSS, Bootstrap, and JavaScript**. Passionate about building secure, scalable, and user-centric web applications with clean architecture and efficient databases.

## Experience

### Shift0 Pvt. Ltd. (WhiteBrands Venture Pvt. Ltd.)

May 2024 – Nov 2024

Software Engineer

Gurgaon, Haryana

- Developed and maintained e-commerce logistics systems with order management and shipment tracking features.
- Built and optimized CodeIgniter-based web applications following OOP and MVC principles.
- Integrated **Razorpay** payment gateway and Shopify APIs for automated product and order synchronization.
- Collaborated with cross-functional teams to deliver high-performance, scalable backend systems.

### NimpleAppGenie

Nov 2022 – Jan 2024

PHP Developer

Jaipur, Rajasthan

- Developed and maintained full-stack web and mobile applications with secure API integrations.
- Built responsive front-end interfaces with HTML, CSS, Bootstrap, and JavaScript.
- Optimized application performance and implemented modular, reusable code structures.

### Premad Software Solution

Jan 2021 – Oct 2022

PHP Developer

Jaipur, Rajasthan

- Enhanced existing modules and implemented new features for client-based web solutions.
- Worked on backend development using Core PHP and CodeIgniter frameworks.
- Improved system stability, API response times, and database performance.

## Projects

### SourceInfi — PHP (CodeIgniter), MySQL, Razorpay, Shopify API

- Developed a dropshipping platform for product sourcing, supplier management, and automated logistics.
- Integrated Shopify API for real-time product and order sync, optimizing MySQL performance.

### Close2mi — Laravel, RESTful APIs, Stripe, MySQL, JavaScript, Google API

- Built a salon booking app supporting user authentication, real-time booking, and online payments.
- Developed REST APIs and integrated Stripe for secure transactions.

### DRT — Laravel, MySQL, RESTful APIs, HTML, CSS, JavaScript, Google API

- Developed a mental health and wellness platform for therapy sessions, subscriptions, and progress tracking.
- Built RESTful APIs for features like activity tracking and subscription management.
- Integrated walking step counter and built an admin panel for user and content management.

### Aapni Taxi — PHP (CodeIgniter), MySQL, RESTful APIs, Razorpay

- Developed an online taxi and car rental service platform for real-time ride booking and trip tracking.
- Integrated REST APIs for booking, driver management, and payment modules using Razorpay.
- Improved Admin and Driver Panel functionalities for better control and real-time monitoring.

### Mosambi India — PHP (CodeIgniter), RESTful APIs, Razorpay

- Developed a blood donation coordination platform from scratch with backend and API integration.
- Integrated Razorpay for secure payments and optimized response times for better performance.

### DC Jewelry — Core PHP, MySQL, Razorpay, HTML, CSS, JS

- Enhanced a Core PHP jewelry e-commerce platform with improved backend and stock management features.
- Developed new modules and fixed system bugs to improve usability and stability.
